for elemental analysis

Ordering Information

We are happy to accept orders by any of the following methods:

Phone: +44 (0)1837 54446
Fax: +44 (0)1837 54544
E-mail: enquiries@microanalysis.co.uk
Online: www.elementalmicroanalysis.com
Mail: Elemental Microanalysis Ltd
1 Hameldown Road
Okehampton Business Park
Okehampton
Devon EX20 1UB
United Kingdom

We can invoice you in Sterling, Euro or US Dollar, and accept Visa or Mastercard payments; account facilities are readily available for regular customers, please enquire.

Shipping Worldwide

We regularly ship directly to customers in all parts of the world, and our staff are highly experienced in shipping dangerous goods. Local dealers are available in many countries: contact us for details.

www.elementalmicroanalysis.com

Available locally from:

Literature Available from Elemental Microanalysis

Catalogues, product sheets and other literature are available electronically by downloading from the [Download Documents](#) page on our website; printed version are available by e-mailing your request to enquiries@microanalysis.co.uk, or by filling out and returning the Literature Request Form on p29–30 of this catalogue.

Catalogues

Our catalogues cover the following areas of elemental analysis:

- Micro CHNOS
- IRMS Supplement
- Inorganic
- Organic Carbon/Sulphur
- Macro CN/CHN/CNS/N-protein
- Nitrogen/Protein
- Capsules
- Laboratory Analysis Service

Our catalogues are also available to download from the website.

Product Sheets

Product sheets are available for every instrument we support. These cover all the common day-to-day items required to run your instrument.

A complete list of all instruments we support can be found on p29–30 of this catalogue.

Contract Analysis Service

Our UKAS accredited ISO 17025 laboratory offers analysis testing for organic, inorganic and stable isotopes. For additional details see p28 of this catalogue, or visit our website, elementallab.co.uk, for full details of services and sample submission forms.

Contents

- 4 Company Introduction
- 6 Pressed tin capsules and pans
 Pressed tin capsules and pans for solid samples are manufactured to exacting standards, ensuring consistently low blank values and uniform weight.
 Available in: [Standard weight](#) – for routine use
[Ultra-light weight](#) – 40% lighter than standard weight, – less swarf build-up, lower blank values, improved oxygen availability
[Standard weight ultra-clean](#) – standard weight capsules, solvent washed
[Ultra-light weight ultra-clean](#) – 40% lighter than standard weight, solvent washed
- 10 Smooth wall tin capsules
 Smooth wall tin capsules for liquid samples are extruded to exacting standards, ensuring consistently low blank values, high quality fabrication and low weight. Available with a flat base or a round base.
- 11 Tin weighing boats
 Tin weighing boats for solid or liquid samples; available in various weights.
- 12 Tin foil squares, discs, cones and cups
 Tin foil squares and discs are ideal for encapsulating sticky, fibrous or other samples; they are available in standard and ultra-light weights. Tin cones are useful for larger samples, and tin cups are useful for evaporation of samples.
- 14 Pressed silver capsules and pans
 Pressed silver capsules for solid samples are available in standard and ultra-light weights, and pressed silver pans are available in standard weight.
- 16 Smooth wall silver capsules
 Smooth wall silver capsules for liquid samples are available with a round base. Precise manufacturing ensures consistently low blank values, high quality fabrication and low weight.
- 16 Silver weighing boats
 Silver weighing boats for solid or liquid samples, manufactured from high purity silver.
- 16 Silver foil discs and squares
 Silver foil squares and discs manufactured from high purity silver foil, ideal for the encapsulation of sticky, fibrous or other samples.
- 17 Pressed aluminium capsules and pans
 Pressed aluminium capsules for solid samples, available in standard weight and ultra-clean standard weight, and pressed aluminium pans available in standard weight.
- 19 Smooth wall aluminium capsules
- 19 Aluminium weighing boats, foil discs and squares
- 20 Nickel encapsulation
 Pressed nickel capsules, smooth wall nickel capsules, nickel weighing boats and foil squares.
- 21 Other sample encapsulation
 Copper capsules and weighing boats, platinum weighing boats and cellulose or gelatin capsules.
- 22 Tools and accessories
 Multiwell plates, spatulas, forceps and sealing devices.
- 23 Cross reference
- 28 Analysis service
- 29 Literature request form

The use of OEM part numbers is intended for convenience only, and does not imply that the products are of OEM origin. All Elemental Microanalysis products are guaranteed to be of high quality and are deemed to be suitable alternatives in the stated instruments. All OEM trademarks acknowledged.

Introduction

About the Company

Elemental Microanalysis has grown from small beginnings over 40 years ago as a micro-analytical laboratory to its current form as a leading manufacturer and supplier of consumables, supplies and other products for elemental analysers. We operate from our purpose-built factory, warehouse and laboratory complex in Devon, UK.

You learn a lot in 40 years – a lot about your products – how to make them and how to use them, a lot about your customers and their needs. We have been developing, refining and using products for elemental analysis since 1976 and have a unique in-depth knowledge of instruments from all manufacturers.

These days we offer the world's largest range of products for elemental analysers, sending our products to customers across the globe. We take

great care with the quality of our products. The vast majority are manufactured in-house by our trained technicians within our ISO 9001:2015 certified quality system. But we don't just make the products – we use them every day in our own analytical laboratory, giving us constant feedback on their performance. We do not compromise on quality and don't expect you to either. Our total satisfaction guarantee backs up our commitment to our product quality.

'Price is what you pay, value is what you get'.

As the leading independent supplier of elemental analysis consumables we can offer substantial savings in comparison to the prices charged by the original supplier of your instrument. But we know that you need more from a supplier than simply low prices. You need to buy with the confidence that your analysis will not be compromised by poor quality consumables and the knowledge that your supplier has all the resources to provide the full range of support that you expect.

We will always treat our customers with honesty and integrity. If we do make a mistake we don't try to hide it – we recognise it and put it right.

We won't sell you short measure and we won't mislead you in any way. Our business is built on long-term relationships, as our customers will testify – many have been with us for more than 30 years.

'price is what you pay –
value is what you get'

Guaranteed quality

Our company's quality system is certified to ISO 9001:2015 by LRQA, we have an ISO/IEC 17025:2017 UKAS accredited Testing Laboratory, and we are an ISO/IEC 17034:2016 UKAS accredited Reference Material Producer. Our confidence in our products allows us to offer you a total satisfaction guarantee: if our product does not perform at least as well as the brand of product you usually use, you can return it for a full refund.

Try our products – free of charge!

Try before you buy – we have sample packs available for most elemental analysers on the market. Just let us know the instrument you have and we will send you a trial quantity of 3–4 different consumables to try – free and with no obligation. Offer limited to one per customer.

Sales service

Our friendly sales staff will ensure that your order is despatched promptly and correctly. They can tell you about our stock levels, prices, shipping arrangements, or answer any other queries you may have. Most orders are despatched within 24 hours of receipt. Rush orders receive special attention and are processed immediately. If you have an urgent problem or need priority despatch, please let us know.

Technical service

In this catalogue we have tried to provide the most accurate and complete information possible about our ever-expanding range. We realise, however, that you may require additional technical information.

For this reason we have technical specialists on hand to answer your questions and advise you on selecting the products best suited to your needs. We can also supply samples, and even develop new products for your particular application.

Design changes

We are constantly working on improving our products and these improvements may mean that some products differ from the descriptions in this catalogue. Our technical staff are happy to discuss any improvements made, and the resultant benefits. Check the website and join our mailing list to keep up-to-date with the latest products and developments.

Pressed tin capsules for solid samples

Elemental Microanalysis pressed capsules for solid samples are available in standard and ultra-light weights. They are manufactured to exacting standards ensuring consistently low blank values and uniform weight.

They can be used without any cleaning pre-treatment, but for critical samples solvent cleaning is recommended. They should not be ultrasonically cleaned as damage may result. We also offer ultra-clean capsules in certain sizes of both standard and ultra-light weight capsules.

Standard weight pressed tin capsules

Pressed tin capsules for routine use.

Smooth tin capsules for liquid samples

Elemental Microanalysis smooth wall tin capsules for liquid samples are extruded to exacting standards to ensure consistently low blank values, high quality fabrication and low weight. Smooth wall capsules can be used without any cleaning pre-treatment, but we recommend solvent cleaning for critical work.

The capsules can be sealed using a proprietary sealing tool (F5109), or mole grips (E2043), available from our microanalytical sundries section.

Tin foil squares

for fibrous or sticky samples

Elemental Microanalysis metal foil squares are ideal for the encapsulation of sticky, fibrous or other samples which are difficult to handle using conventional pressed capsules. A small dab or a few fibres on a disc or square is easily encapsulated by folding the foil around the sample. With a little practice even glass fibre filters can be rolled up in foil to form neat cylinders which fit the instrument carousel.

These foils can also be formed into compressed pellets using the appropriate size of manual sample press, shown on page 22 of this catalogue.

Guide by actual size

Standard weight tin foil squares

Standard weight tin foil squares, manufactured from high quality tin. Suitable for routine use.

These foils can also be formed into compressed pellets using the appropriate size of manual sample press, shown on page 22 of this catalogue.

Pressed silver capsules and pans for solid samples

Elemental Microanalysis pressed silver capsules and pans for solid samples are available in standard and ultra-light weights, are manufactured to ensure consistently low blank values and uniform weight. We also offer ultra-clean solvent washed capsules in some sizes of standard weight silver capsules.

Silver is usually used to encapsulate samples for oxygen determinations, or when acidifying samples in an open capsule to remove inorganic carbon. In the latter case, after acidification and drying, many users then enclose the sample in a tin capsule to seal in the surface residual acid and ensure the sample does not spill. Silver does not combust like tin, but melts, forming a pool in the ash/swarf crucible. Using light weight silver capsules if possible will result in less residual silver.

Standard weight pressed silver capsules

For routine use.

Pressed aluminium capsules

for solid samples

Elemental Microanalysis pressed aluminium capsules for solid samples are available in standard weight, and ultra-clean standard weight. They are manufactured to exacting standards ensuring consistently low blank values and uniform weight.

Aluminium capsules can be used in place of tin for certain applications. While solvent rinsing may remove surface traces, aluminium capsules can be pre-combusted at 550° C to remove contaminants, so are particularly recommended for low level C and N analysis.

Standard weight pressed aluminium capsules

Pressed aluminium capsules for routine use.

D9004

Cellulose capsules

Cellulose capsules are useful in N/Protein analysis, as cellulose has a very low N blank, and it produces only $\frac{1}{20}$ of the ash that tin does.

Description	Pack	Part No
Rapid Caps	190	D1117
Cel Capsules 7.5 x 24mm	400	D9004
Cel Capsules 8.5 x 25mm	400	D9005

Accessories

Multiwell plates

Multiwell plates are used to store weighed samples prior to analysis. The use of the silicone seal for the 96-cell plate will help prevent cross-contamination if samples leak during transport.

Sealing devices

E2043 Mole grips, miniature

F5109 Sealing device for liquids

Suitable for use with approximate capsule sizes as shown below: (H x D/mm)

F5112 Sealing device

Manual sample presses

Available in four diameters, our compact, high quality manual presses produce uniform compressed sample pellets with ease. They can be used with flat foils, cone foils, boats or capsules.

- E2534 Manual press, 5mm pellet diam.
- E2535 Manual press, 7mm pellet diam.

- E2536 Manual press, 9mm pellet diam.
- E2537 Manual press, 10.5mm pellet diam.

Weigh the sample into the foil, lightly close it, and place in the top of the cylinder.

Use the plunger to compress the sample, drive out ambient air, and form a pellet.

Remove the pellet using the plunger to push the pellet out of the cylinder, and re-weigh.

The use of the OEM part numbers is intended for convenience only and does not imply that the products are of OEM origin.
All Elemental Microanalysis products are guaranteed to be of high quality and are deemed to be suitable alternatives.
All OEM trade marks acknowledged.

The use of the OEM part numbers is intended for convenience only and does not imply that the products are of OEM origin.

All Elemental Microanalysis products are guaranteed to be of high quality and are deemed to be suitable alternatives.

All OEM trade marks acknowledged.

Elemental Microanalysis – a global company

Our quality products are sold world-wide, via our network of Dealers and through direct sales.

■ Current sales areas world-wide

What our Quality Accreditations mean for you

Our Dealers and customers know they are receiving quality, reliable products when they work with Elemental Microanalysis. Our company's quality system is certified to BSENISO 9001:2015 by LRQA; we have an ISO/IEC17025:2017 UKAS Accredited Laboratory; and we are an ISO/IEC17034:2016 UKAS Accredited Reference Material Producer.

Consistency is critical for laboratory accuracy. Here at Elemental Microanalysis, we offer excellence in both materials and staff, providing a reassuring, reliable and consistent choice for your business.

'reliable and consistent'

Our staff is invested in your success and ready to support Dealers, analytical laboratories and other customers in meeting the demands of modern research.

Our accredited products, services and systems are frequently reviewed as part of external quality assessment. Our quality management team are dedicated to ensuring you receive the best products and services, giving you confidence and peace of mind.

'Confidence and peace of mind'

Resources for Dealers

Elemental Microanalysis provides many resources to support for our dealer network

- Catalogues
- Product sheets for individual analysers
- Safety data sheets (SDS)
- Informational sales tools such as product cross reference lists, promotional communications and tables of reference material values.
- Promotional product images

All these resources are available for download via our Dealers Sharepoint – please enquire for access. We can also provide materials for Exhibitions and Trade Shows.

Analysis Service

Our UKAS accredited ISO17025 Laboratory performs CHNOS and nitrogen/protein analysis, and offers specialized capability for air sensitive samples. We can also provide halogen, organic TOC, inorganic, and stable isotope analytical services.* Our analytical services cover a diverse range of sample types and applications, performed by a laboratory with over 40 years of accumulated analytical expertise.

- Rapid turnaround of results
- Expedited service also available
- UKAS accredited Testing Laboratory No. 4260
- ISO 9001 certified management system

Whether you have a single sample, or an on-going research program, we offer you commitment to precision and accuracy at an affordable price.

Products from Elemental Microanalysis

Operating from Devon UK, our business holds three separate accreditations: ISO 9001 for our huge product range, supplying customers worldwide with high quality analytical consumables at value prices; ISO 17025 for our analytical services laboratory; and ISO 17034 for our new range of certified standards. Our qualified despatch and sales teams can organise safe, speedy and economical shipment of your orders worldwide by air, road or sea.
