

Laboratory Analyst

Job Description

Our busy commercial laboratory wishes to recruit a Laboratory Analyst who will work in our laboratory located in Okehampton, Devon.

You will be resourceful, with a range of skills to develop and grow the analytical services operations.

The role would be suitable for a practical and organised person with enthusiasm for working in a commercial laboratory setting.

Duties/responsibilities

Reporting to the Technical Director and Laboratory Analysis Manager, the role will include:

Planning laboratory work schedules

Working with and supporting laboratory staff in their daily operations

Maintaining and operating a range of analytical instruments, including Elemental Analysers, Isotope Ratio Mass spectrometers, Ion Chromatographs etc.

Accurate recording, processing and reporting analysis data to customers and/or to other staff

Adhering to quality standards and health and safety regulations, including ISO17025, ISO9001, ISO17034

Preparing samples for analysis

Carrying out routine tasks specified by daily requirements

GLP

Preferred Skills

Ideally with practical experience of working in a laboratory, although training would be provided/or the ability to learn practical techniques & apply this knowledge

Ability to plan laboratory work schedules

Good time management of simultaneous projects and flexibility in supporting day-to-day activities

Good interpersonal and motivational skills

Ability to work independently and as part of a team

Experience working within quality systems and standard operating procedures

Good verbal, written and IT skills

Meticulous, organised and tidy

Benefits: Bonus scheme

Job Type: Full-time, Permanent
