E4408 TC/EA Furnace Assembly

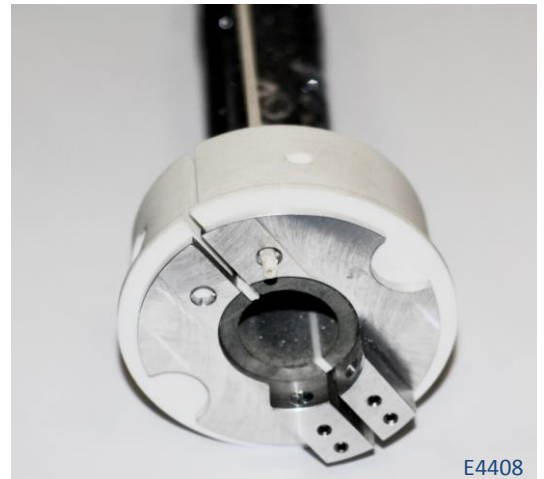

E4408

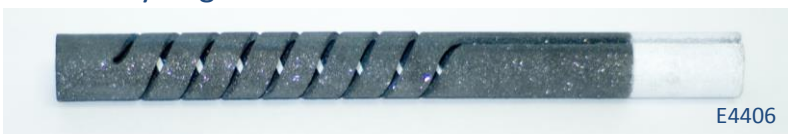

Frequent failure of the furnace in the Thermo TC/EA is accompanied by damage to the upper ceramic insulators and electrical contacts.

Elemental Microanalysis now offers a complete replacement assembly consisting of heating element, ceramic insulators and spacers, aluminium half shells, electrical contacts and thermocouple guide tube, all ready for installation into the furnace box. Please note that this assembly does not include the thermocouple.

Purchasing this complete matched parts assembly also solves problems fitting replacement elements caused by large variations in element diameter.

E4408

E4406

However, for those who still wish to purchase the element only, this is still available - our part no E4406.
